

General Information**705 3 Ply White NBR 150 Smooth C X FS**

MWR Part#	705
Description	3 Ply White NBR 150 Smooth C X FS
Additional Specifications	6603(18)(4-1).015
Applications	
Product Category	
Main industry segments	
Special features	

**Product Construction Design**

Conveying side material	NBR
Conveying side surface	Smooth
Conveying side property	
Conveying side color	
Traction layer (material)	
Number of Plies	3
Pulley side material	Fabric
Pulley side surface	
Pulley side property	Friction
Pulley side color	

Product Characteristics

Antistatically equipped	No
Food suitability, FDA conformance	Yes

Technical Data

Thickness of belt	3.43 mm, 0.135 in
Mass of belt (belt weight)	4.05 kg/m ² , .83 lbs/ft ²
Elongation at 2%	26.8 N/mm, 150 lbs/in
Min. operating temperature	0 °F, -17.8 °C
Max. operating temperature	250°F, 121 °C

Joining Related Properties

Primary Joining method	Overlap splice
Secondary Joining method	Mechanical lace
Minimum Pulley Diameter	3.0 in, 76.2 mm

Application specialists are ready to help — call 763-559-2551. On-site installation team available.
